

WELDING (WTEC)

WTEC 108, OXY-FUEL WELDING AND CUTTING 2 (4)

This course covers the basic theories and practices of oxyacetylene gas welding, cutting, and brazing, types of welding equipment and operational safety issues. Welding equipment design, use, care, and maintenance are emphasized. Oxy-Fuel laboratory work will include fusion welding, brazing, and manual and semiautomatic cutting. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Concurrent: WTEC 111.

Typically Offered: Fall Semester

WTEC 111, WELDING SPECIFICATIONS/PRINT READING 2 (2)

This course covers basic engineering drawing principles, fundamental concepts of welding specifications, symbols, and blueprint reading as used in industry, and types of welding equipment and operational safety issues. Emphasis is on print reading, interpretation, and analysis, and safety procedures.

General Education: IN1

Course Entry Requirement(s): None

Typically Offered: Fall Semester

WTEC 112, WELDING CODES AND STANDARDS 2 (2)

This course is designed to familiarize the student with the many governing codes and standards that are used in the welding industries today. Emphasis is to not only learn the correct applications of welding codes and standards, but to become aware of their function as a quality tool.

General Education: IN1

Course Entry Requirement(s): Concurrent: WTEC 108 or WTEC 116

Typically Offered: Summer Semester

WTEC 116, BASIC SHIELDED METAL ARC WELDING 3 (5)

This course covers the basic theories and practices of AC and DC shielded metal arc welding, flat position welding of ferrous metal, and required welding code applications. Welding equipment design, use, care, safety, and maintenance are emphasized. Laboratory, exercises that develop welding skills in a variety of welding positions will be practiced. Welding power source selection will also be studied. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Concurrent: WTEC 111.

Typically Offered: Spring Semester

WTEC 212, WELDING FABRICATION, LAYOUT/DESIGN 4 (6)

This course introduces the student to the field of welding fabrication. It will provide the student the opportunity to apply knowledge of welding metallurgy, filler metal selection, testing and inspection of welds, Welding codes, standards and certifications, joint design, layout plans, and cost estimates to welding fabrication projects. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Prerequisite: WTEC 116

Typically Offered: Summer Semester

WTEC 216, WIRE FED PROCESSES 3 (5)

This course covers the basic principles and practices of gas metal arc welding (GMAW). Laboratory work involves the application of GMAW as it is used in industry today. Use of various metal transfer modes for aluminum and steel, joint styles, welding positions, and manipulation techniques will be emphasized. Wire fed processes will include sub-arc theory. Laboratory exercises will include flux-covered arc welding. Welding equipment, design, use, care, safety and maintenance are emphasized. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Concurrent: WTEC 116

Typically Offered: Fall Semester

WTEC 217, GAS TUNGSTEN ARC WELDING 3 (5)

This course covers the basic principles and practices of gas tungsten arc welding (GTAW). Laboratory work involves the application of GTAW as it is used in industry today. Use of various metal transfer modes for aluminum, carbon steel, and stainless steel, joint styles, welding positions and manipulation techniques will be emphasized. Welding equipment, design, use, care, safety and maintenance are emphasized. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Prerequisite: WTEC 116

Typically Offered: Spring Semester

WTEC 218, ADVANCED ARC WELDING 2 (4)

This course covers advanced theories and practices of groove, pipe, resistance and other material joining principles. Welding equipment design, use, care, safety and maintenance are emphasized. Laboratory exercises that develop welding skills in a variety of welding positions will be practiced. Welding power source selection will also be studied. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Prerequisite: WTEC 116

Typically Offered: Spring Semester

WTEC 221, WELD QUALITY INSPECTION 3 (5)

This course introduces the student to the variety of weld test procedures used in the welding industries, and how to determine weld strength and selection of proper weld materials. Test procedures such as visual weld inspection, non destructive testing, and radiographic testing will be covered. Laboratory required. (A special fee will be assessed.)

General Education: IN1

Course Entry Requirement(s): Concurrent: WTEC 112

Typically Offered: Fall Semester

WTEC 287, WORK-BASED LEARNING I - WTEC 1-3 (1)

This course provides supervised, paid work experience with approved employer(s) in an area related to the student's program. Emphasis is placed on integrating prior or concurrent classroom learning with work experience through career readiness competencies. Students will be able to evaluate career selection and satisfactorily demonstrate work-related competencies.

General Education: IN1, IN2, IN3, IN4

Course Entry Requirement(s): A student must be pursuing a degree seeking program at LCCC; have completed 12 semester hours with a minimum of 6 semester hours in the discipline of placement; have a min GPA of 2.5 in the discipline and a 2.0 overall GPA; and have division approval.

Typically Offered: Offer as required

WTEC 288, WORK BASED LEARNING II - WTEC 1-3 (1)

Building on experiences from Work Based Learning I, this course provides supervised, paid work experience with approved employer(s) in an area related to the student's program. Emphasis is placed on integrating prior or concurrent classroom learning with work experience through career readiness competencies. Students will be able to evaluate career selection and satisfactorily demonstrate work-related competencies.

General Education: IN1, IN2, IN3, IN4

Course Entry Requirement(s): Prerequisite: WTEC 287

Typically Offered: Offer as required

WTEC 289, WORK BASED LEARNING - WTEC 1-3 (1)

Building on experiences from Work Based Learning II, this course provides supervised, paid work experience with approved employer(s) in an area related to the student's program. Emphasis is placed on integrating prior or concurrent classroom learning with work experience through career readiness competencies. Students will be able to evaluate career selection and satisfactorily demonstrate work-related competencies.

General Education: IN1, IN2, IN3, IN4

Course Entry Requirement(s): Prerequisite: WTEC 288

Typically Offered: Offer as required

WTEC 299, INDIVIDUALIZED STUDIES IN WELDING 1-2 (1)

An in-depth study of areas of various welding studies presented by discussion and/or individual research and reading. Topics will vary. Repeatable up to a total of four (4) credit hours.

Typically Offered: Offer as required
